

CoCo[®] Communicator is a voice, video, and data softphone application designed for easy use on PDAs and PCs in any mobile or tactical environment.

CoCo Communicator automatically detects and communicates over self-organizing networks that protect user data according to US Government standards.

Versatile voice communications:

- Push-to-Talk (PTT) - PTT conferences with an unlimited number of participants
- Direct dialing - full duplex peer-to-peer calling
- Landline and wireless phones calls - a numeric keypad supports easy outbound dialing and the Communicator supports inbound calls

Powerful tactical networks and talk groups:

- Communicator tactical talk groups have no central points of failure.
- Any number of tactical voice networks can be created. Individuals can switch from one tactical network to another and when a tactical team is split into smaller groups, the smaller groups maintain their communications

Integrated video monitoring and surveillance:

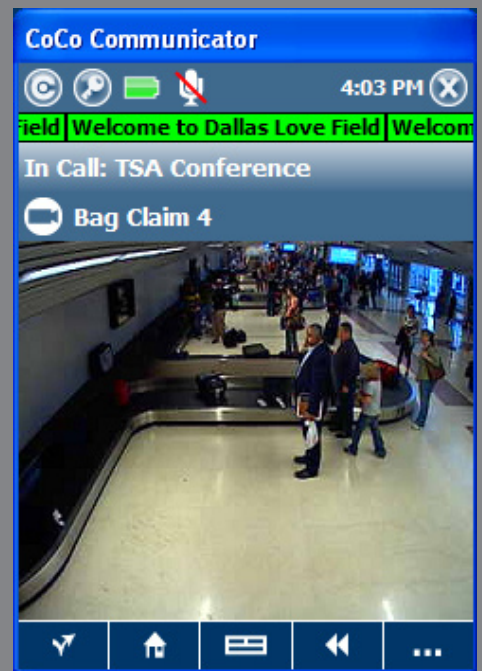

- Cameras on the network are listed and easily accessed with the touch of an icon
- Conferences and direct calls can continue while monitoring video for improved situational awareness

Ticker messages for group communications:

- View ticker messages published from CoCo[®] Interoperability Controller
- Ticker messages are color stamped for urgency and can be date stamped at the time of creation

Easy end user training:

- Simple UI is designed with large buttons for accurate selection on a touch-screen PDA, tablet, or other device
- Communicator UI is consistent across all platforms

Why CoCo Interop?

Affordable - Dramatically less expensive than a radio system upgrade

Mobile - Delivers audio video and data in challenging mobile situations

Complete - Ties together radios and other systems for total situational awareness

Federally Tested - Tested and used by the US Coast Guard, Army and Navy; at the Defense Interoperability Communications Exercise (DICE) in 2006 and 2007 at the DoD Joint Interoperability Test Command (JITC); and is FIPS 140-2 validated

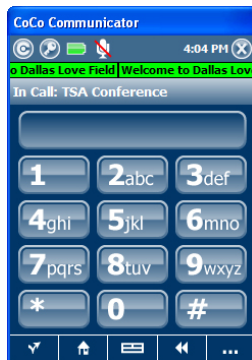

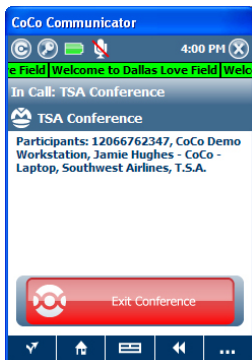

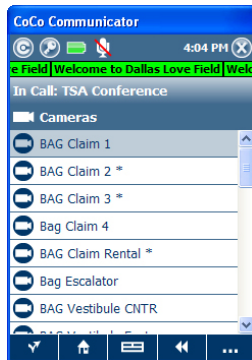

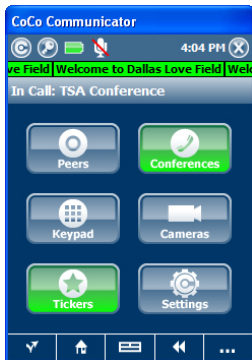

Easy - Simple to use and can be installed with basic system and network administration skills

Scalable - No limit to the size of your network

CoCo Communicator

NETWORKS WITHOUT BOUNDARIES

CoCo Communicator provides secure voice, video, and data communications on laptops and PDAs.

Easy to use screens quickly show the information you need and large touchscreen buttons allow for accurate selection:

- One click from the home screen will take you to key Communicator functionality
- Header bar indicates activity, such as active conference calls or ticker messages
- Communicator users can see who is participating in a conference, including radio users and phone callers
- Conferences, network participants, and cameras are listed in an scrolling list for one touch dialing or camera viewing
- Unique icons tell users what type of device is being called
- Scrolling ticker messages can deliver important updates
- Ticker messages are visible from all Communicator screens
- Icons at the top of the screen quickly relay important information, such as network connectivity, security status, and battery life for easy troubleshooting

System Requirements:

- Windows XP SP2, SP3
- Windows Server 2003 SP1, SP2
- Windows Mobile 5.0, 6.0

Handheld Platform Overview:

- Cingular 8925
- Symbol MC70p

Default Security Configuration:

- **End-To-End Cryptography**
Pluggable Cryptographic Suites - Default Algorithms: AES-128, Diffie-Hellman, Key Exchange, SHA-1; other algorithms possible
- **Link Cryptography**
Pluggable Cryptographic Suites - Default Algorithms: AES-128, Diffie-Hellman, Key Exchange, SHA-1; other algorithms possible

Remote Monitoring of CoCo Tactical Mesh Routers and Tactical Radio Gateways:

- Battery Status
- Link Quality

Camera:

- 320x240 resolution only
- Frames per Second (FPS)
 - Windows XP: max. 20 FPS
 - Windows CE: max. 5 FPS
- Compatibility - Axis MJPEG over HTTP cameras

Voice Communications:

SIP/RTP

- Peer-to-Peer
- Codecs - GSM, G711
- Push-to-Talk
- Broadcast Conference
- Managed Conference
