CoCo Communications Announces Carey V. Tubbs as VP of Government Business Development

Seattle, WA (September 10, 2009) – CoCo Communications Corp., a leader in mobile mesh networking and voice and radio interoperability, is pleased to announce that Carey V. Tubbs will assume the role of Vice President of Government Business Development. Mr. Tubbs will report to John DeFeo, CEO of CoCo, and will be responsible for growing the company's sales with the Federal Government.

Mr. Tubbs has over 25 years of global technical sales, marketing and management experience and is skilled in addressing the complex IT requirements of Federal agencies, systems integrators and diplomats. Mr. Tubbs' clients have included the Federal Bureau of Investigation, Federal Bureau of Prisons, Department of Homeland Security, Internal Revenue Service, Department of Defense, Federal Aviation Administration and the British Government (Home Office).

"Carey Tubbs was chosen to work at CoCo because of his consistent record of selling cutting-edge technology to the Federal Government," said DeFeo. "He has been a great asset to CoCo over the past year and we are very excited to have him assume responsibility for CoCo's Federal business development."

Mr. Tubbs joined CoCo in 2008 and has become a valuable member of the company. CoCo continues to make strides in the arena of mobile mesh networking and its cutting edge technology delivers secure and resilient networks for government end users.

"CoCo is one of the most exciting technology companies I have seen in my career with the Federal Government. CoCo's solutions for tactical networking, security and interoperable communications are unmatched, and I look forward to leveraging my background to grow this company from a thought leader into a market leader," said Mr. Tubbs.

About CoCo Communications

CoCo Communications Corporation builds networks and communication solutions that move with you at the tactical edge to enable people in any mobile or fixed environment to share information securely and reliably. CoCo's proven architecture is Federally tested, globally scalable, and creates self-organizing IP networks with no centralized infrastructure, points of failure, or changes to your applications.

Since 2002, CoCo has worked closely with local, state, and Federal public safety agencies to solve difficult challenges with networking and radio interoperability. CoCo's customers have included public safety agencies, the U.S. Coast Guard, U.S. Department of Homeland Security, U.S. Department of Defense, major urban areas, counties, and school districts.
